

Information and Communication Technology Agency of Sri Lanka

Preliminary discussions on implementation of a National Data Center

The Information and Communication Technology Agency of Sri Lanka (ICTA) on behalf of the Government of Sri Lanka wishes to commission a Tier 3 Data Center that will cater to legacy bare-metal caging, standard rack-space consolidation, and cloud services consolidation. The National Data Center (NDC) will consolidate all hardware and software resources in to a single location, with the aim of offering central hosting and managed services for all the institutions of the Government including cost effective software application solutions. NDC will enable access to the e-Government services reliably, efficiently and securely.

ICTA will study and design the NDC by considering impact to environment, costs, suitable locations for primary Data Center and disaster recovery center, implementation methodology, resource requirements, security, efficiency, reliability and overall architectural designs. Therefore, ICTA intends to conduct a preliminary study by obtaining the required information of services on the following areas of work.

- Engineering and Preparation (C1, EM1 Class)
- Power
- Environmental Controls
- Security and Monitoring
- Network
- IDC and Data Center equipment
- Project Management

The interested parties shall provide required information and schedule for a presentation and discussions. Please send your information and company profile in relation to components specified above. All interested parties are informed that all correspondence shall be in English language.

Interested parties may obtain further information from Mr. Gavashkar Subramaniam, Programme Manager, ICTA by contacting via phone: +94 11 2369099, Fax: +94 11 2369091 and email: info@icta.lk

All requested information must be emailed no later than **1500 hours on 30th September 2016** to: info@icta.lk. Subject field of email should be marked "Preliminary discussions - National Data Center"
